

HEMOGLOBIN POWDER PORCINE

PRODUCTION PROCESS

This is a high quality protein feed, which is made of quarantined fresh blood of healthy animal and produced by special technology. The powder is 100 % from absolute fresh porcine blood and 100 % natural without any additives. It has high protein content, and balanced amino acid component which is easy to be absorbed by intestines of the animals. The blood red cells are completely dissolved during the process, which drives all kinds of proteins in the powder, to be well absorbed.
