

SCANDINAVIAN FISHMEAL

PRODUCTION PROCESS

Scandinavian Fishmeal is produced in Norway and/or Denmark and/or Iceland with high technical and hygienic conditions. Scandinavian Fishmeal is a whole meal dried in a multiple drying process with all solubles included. The most effective chemical and salmonella control is carried out ensuring that the meal is of approved quality before shipment.

SPECIFICATIONS	MIN	TYPICAL	MAX
Protein		70,0 %	
Moisture			10,0 %
Fat (Soxhlet)			13,0 %
Salt (NaCl)			4,0 %
Total Volatile Nitrogen (TVN)			0,25 %
Salmonella		not detected	
Antioxidant		ethoxyquin	
Contaminants		EU limits	

MINERALS, AVERAGE VALUES	% IN DM
Calcium	3,3
Phosphorus	1,9
Sodium	1,2
Potassium	1,5

APPLICATIONS

Scandinavian Fishmeal is characterized by high protein content with a favorable amino acid composition. The meal is mainly used in feed mixtures for fish, poultry and pigs.
